mileage diverted by locating nearby recycling opportunities.

ISG, EASTBOURNE

The Client

ISG, a global construction specialist, is committed to promoting their sustainability agenda through its business operations and sustainable business goals. With a mission to drive revolutionary change in the industry, ISG have many similar values to Encore, one of which is to support communities who's lives are improved for knowing us and at no extra cost to them.

The Challenge

On completion of a branch refit for client Nationwide Building Society, ISG removed approx. 1,000 carpet tiles from site, all of which were identified in good condition.

As part of its key operational values to reduce carbon footprint, minimise waste and support communities, ISG turned to Encore Environment to find a zero to landfill solution that would also benefit the local environment.

The Solution

Using Encore's unique web-based tool, ProjectDIVERT, we identified a local diversion opportunity that would not only improve costs, carbon savings and the Corporate Social Responsibility of our client but also better social and economic outcomes for

Carpet tiles at Nationwide Building Society before removal.

the environment. ProjectDIVERT located two charities nearby the site, a local Arts and Crafts Community Centre and a local Village Hall, who, gratefully received the donations.

“ Thank you so much for your help in making this happen for us. ”

- Carey Godwin, Trustee, Ewyas Harold Arts and Crafts Community Centre

The Results

By innovatively reprocessing the carpet tiles from site, Encore successfully reached 100% diversion from landfill. Furthermore, we achieved 40% cost savings for our client by employing a cheaper, more direct means of disposal than traditional routes.

Managing the logistics, Encore are able to provide full duty of care for the transport of these materials.
